OMUNIX
INTERNATIONAL

Job title: Web Developer
Location: 100% Remote
Type: Full-time-Part time

Omunix International, the franchise of Omunix Argentina, is a talent search company dedicated to connecting talented individuals in Argentina with exciting digital job opportunities in Europe and the United States.

As a Web Developer, you will be responsible for designing, developing, implementing, and maintaining websites and web applications. Your main objective will be to collaborate with multidisciplinary teams to create innovative and functional digital experiences that meet the needs of the business and end users. You will work closely with other developers, designers, analysts, and project managers to meet the development and delivery goals of web projects.

[Brief company description]

Key responsibilities:
- Participate in the design and architecture of websites and web applications, collaborating with multidisciplinary teams to define requirements, identify technical solutions, and establish development standards.
- Develop clean, efficient, and scalable code using programming languages such as HTML, CSS, JavaScript, as well as frameworks and libraries like React, Angular, Vue.js, etc.
- Implement attractive and functional UX/UI designs on websites and web applications, ensuring an intuitive and high-quality user experience.
- Perform performance, compatibility, and security testing on websites and web applications, identifying and proactively solving issues to ensure stability and reliability of the final product.
- Contribute to the full development lifecycle of web projects, from planning and estimation to implementation and delivery, ensuring compliance with project deadlines and requirements.
- Stay updated on the latest trends and technologies in web development, participating in continuous learning activities and sharing knowledge with the team.
- Collaborate with design, development, and testing teams to solve technical issues, provide technical assistance, and continuously improve the quality of web projects.

Requirements:
- University degree in Computer Engineering, Computer Science, or a related field.
- Previous experience in web development, preferably in agile development environments.

- Deep knowledge of programming languages such as HTML, CSS, JavaScript, as well as frameworks and libraries like React, Angular, Vue.js, etc.
- Experience in using web development tools like Git, npm, Webpack, etc.
- Strong problem-solving skills and ability to work autonomously and in a team.
- Excellent verbal and written communication skills, with the ability to convey technical ideas clearly and effectively.
- Results-oriented and ability to work under pressure and meet tight deadlines.

Benefits:
- Competitive salary and performance bonuses.
- Opportunity to work in a dynamic and fast-paced environment.
- Professional development opportunities.
- Flexible work arrangements.
- Supportive and collaborative team culture.
